Dear Friends,

Thank you for your donation of \$153.45, given to support the mission of the Colon Cancer Alliance.

You have taken an important step in helping to fight the second leading cause of cancer death in the United States. Most people with colon cancer have no family history of the disease, and symptoms often do not appear until the cancer is fairly advanced. The CCA is committed to spreading the news that people need to be screened for the disease regardless of family history or symptoms. Regular screening could prevent as many as 80% of colon cancer deaths.

The Colon Cancer Alliance is also committed to giving people diagnosed with colorectal cancer the knowledge they need to receive the very best possible care. The treatment landscape is changing rapidly, and patients have more and more options. The decisions a patient makes in the early days of care can have a major impact on their disease. Through an active Helpline, a robust web site, our Buddy program, and a network of volunteers, we help inform patients about those options.

Your gift makes a significant difference to the people we serve. We know that people live longer and better lives because of the education and support they receive through our programs, and your donation helps us continue in those efforts. Thank you for joining us in the fight against colon cancer.

Sincerely,

A handwritten signature in black ink that reads "Nicole Sheahan".
